## Pioneer Eco-Backpack Sprayer

ADAPCO is excited to introduce the newest sprayer to our equipment portfolio. The ADAPCO Pioneer Eco-Backpack Sprayer is your solution to indoor and outdoor cold fog applications. The ADAPCO Pioneer Eco-Backpack runs off a removable Li-Ion battery that can be charged from a standard wall outlet, giving you the freedom to work wirelessly. With dual speed settings users can fine tune the droplet size, and apply as a barrier or ultra low volume application. Operators and onlookers can breathe easy: unlike most portable sprayers that are powered by burning fuel, the ADAPCO Pioneer Eco-Backpack produces no exhaust, and also runs more quietly than the typical fuel-powered sprayer. Outdoors, the ADAPCO Pioneer Eco-Backpack is an environment-friendly choice. Indoors, you can work in enclosed spaces without worrying about exhaust fumes. So, if you are looking for a portable, cable-free, environmentally friendly, low cost sprayer, ADAPCO has the product for you.
